SUMMARY

Passionate full-stack web developer who thrives on new challenges. Love technology and so engaged in a full-time intensive course to get the skills to be a web developer. Much pride in developing engaging, beautiful websites. Self starter and great team member. Love learning and highly coachable.

EXPERIENCE

GENERAL ASSEMBLY – AUSTIN, TX

Dec 2015 – March 2016

Completing the 12 week web development immersive program focusing on a broad range of technologies including JavaScript, jQuery, Ruby, Rails, Sinatra, Node, Backbone, SQL and noSQL. Worked individually and in teams to create useful and Agile-driven web apps including:

SlackOverFlow – A forum for GA students to post questions and receive answers in a interactive atmosphere.

Low's Digital Challenge- With a team from GA we created a 2D simulator to help homeowners involve young children in big projects.

PROFESSIONAL MORTGAGE, INC– LOGAN, UT Sep 2013 – Dec 2015

I used interpersonal and customer service skills to communicate with clients. This helped me coach and guide clients through the jungles of home financing. I used critical thinking skills to develop the best program and solution to satisfy the client's needs. I was able to communicate affectively with other institutions to execute financing for the client. Acquired an attention to detail as I processed important paperwork and data. Completed training to acquire and keep my Utah License.

UTAH STATE UNIVERSITY– LOGAN, UT OCT 2007 – Dec 2012

Joined the team as a walk on and after two years was awarded the Hod and Clover Sanders athletic scholarship. I learned what grit, dedication, honesty, hard work and sacrifice were. I was voted to the team leadership council, and help lead the Aggies to their first bowl game since 1993. During my time with the aggies I was nominated for two national awards for my character and contribution to the team as a walk on. I received WAC conference honors my final year and was honored with most improved player by my team after returning from a torn ACL injury.
